Computer Graphics 1

Final Project Week 2

       I am going to a final project, I am going to draw front of the house and top view, if I will be able to figure out about side view, I would like to do that as well. For now, I am just going to make a simple view and if I have more time, I will include more "impress me". By week 2, I already added front view of house and I am working on side view for next week. If I get side view done by week 3, I am thinking about adding top view as well. I have learned about drawing house from few websites which I am going to include here.
